Ultraviolet Cured

## ADVANCED TECHNOLOGY AT A GLANCE!

### Look to Amalgamated International

for the coating technology you need to enhance the quality of your product and ultimately, increase your profits. Amalgamated International, with over 30 years experience, manufactures a whole range of U.V. Gloss, Matte, & Satin Coatings. Specifically formulated for high speed roller coater machines and digital printing technology.

### OUTSTANDING COATING FEATURES:

**GLOSS**

#### U-VER CURE - GLOSS R.C.

Superior high gloss, high depth finish with excellent adhesion, flexibility and abrasion resistance.

**MATTE**

#### U-VER CURE - MATTE R.C.

Coating cures to a non-burnishing high rub dull finish with a smooth, silky feel. It has outstanding runnability properties without viscosity buildup during press runs.

**SATIN**

#### U-VER CURE - SATIN R.C.

Has essentially the same outstanding performance characteristics of U-VER Cure Matte R.C. except for having a higher reflective gloss reading. The satin gloss finish can be formulated to match any desired gloss finish to meet any end requirement.
