

UV MATTE COATING NEWS

Introducing

U-VER CURE MATTE COATING

A major breakthrough in Ultraviolet Matte Coating Technology specifically engineered for all types of inline or off-line coater applications, including Steinemann presses.

Just imagine if you could achieve the following benefits:

- Excellent viscosity stability from first to last sheet
- No more viscosity alterations in any way by adding alcohol or any other VOC to matte coating material
- No gloss variations during production runs
- Outstanding runnability properties
- Superior non-burnish high scuff and tabor resistance finish to meet the decorative book industry's requirements
- A smooth silky feel
- Excellent interface adhesion
- Create special effects by applying gloss coating over the matte coating finish
